

Lymbyc Systym Shutter Release

With a touring schedule that keeps them on the road seemingly more than it gives them time at home, Lymbyc Systym have miraculously completed their second full-length album, entitled *Shutter Release*. Magnifying the already giant sounds of *Love Your Abuser* was not an easy task, but with Jeff Zeigler behind the boards recording the album and John Congleton (Modest Mouse, Explosions In The Sky) shaping the mixdowns, they've managed to do just that. Instrumentation has become broader, arrangements more grandiose, and melodies more focused, resulting in a sublime second album. While the stacked keys and busy drums that defined their previous outing still create the foundation of much of *Shutter Release*, the Brothers Bell have added acoustic and electric guitars, majestic brass and disembodied vocals to their arsenal. On *Shutter Release*, Lymbyc Systym prove there are few better than them at reviving memories with sound.

Hailing from Tempe, Arizona, Jared and Michael Bell formed Lymbyc Systym late in 2001. Drawing inspiration from the groups Tortoise, Explosions in the Sky, and Four Tet, their compositions cleverly combine vintage keyboards, infectious melodies, analog effects, dynamic drumming, and intricate laptop programming to form melodic and cohesive tracks that blur the borders between post-rock, indie-rock, and the most organic electronic music. Touring in support of the Album Leaf, Crystal Castles, Mice Parade, and a slew of other national acts, and recently becoming a headlining road act in their own right, the brothers have developed a truly impressive live show. From their self-release debut EP, *Carved by Glaciers*, to their recent releases for Mush and split EP with fellow instrumental upstarts *This Will Destroy You*, Lymbyc Systym have quickly etched out a place in the bustling underground music scene.

Catalog: **MH-267**
Genre: **Alternative**
Street Date: **November 3, 2009**

Key Tracks:
01. Trichromatic
02. Ghost Clock
06. Contemporary Art
